SANLORENZO

A.M is a Sanlorenzo SD96 that brings together semi-displacement navigation with space, fluidity, and refined harmony.

Unfolding across three beautifully balanced decks, A.M offers the volume and presence of a much larger yacht while retaining the ease and intimacy that make life on board truly effortless. Conceived by Zuccon International Project, her exterior language blends sweeping forms with expansive deck areas, a custom pool on the upper deck, a generous flybridge, and multiple lounging areas create a natural rhythm of spaces designed for living and entertaining at sea.

Below deck, the interiors favour a living connection to the sea. Wide glazing and seamless transitions between cabins and communal areas dissolve the boundary between inside and out, while carefully selected materials and personalised layouts deliver comfort at every turn. Natural light flows freely throughout, lending each space a calm, refined atmosphere where every moment on board is lived to the fullest.

A.M SD96 accommodates up to 10 guests across 5 beautifully appointed cabins, a full-beam master, two VIP cabins, and two twin cabins, each finished with the same quiet attention to detail that defines every corner of the yacht. A dedicated crew of 5 ensures that every need is anticipated with discretion and care, allowing guests to enjoy the journey entirely on their own terms.

Zero speed and underway stabilizers guarantee a smooth and steady navigation, so nothing interrupts the pleasure of being at sea.

TECHNICAL SPECIFICATIONS

LENGTH	28.93 mt
BEAM	7.6 mt
ENGINES	2 x MTU 10V2000M86 (1380 HP) 1 x 45 kW + 1 x 35 kW generators
